What does the fund invest in?

The fund invests mainly in short term corporate issues such as fixed deposits, commercial papers and trust certificates issued by central bank regulated commercial banks, finance companies and other issuers holding investment grade ratings, BBB- and above.

The charts below give you a snapshot of the fund's investments on October 31, 2018. The fund's investments will change.

Investment Mix (October 31,2018)

How risky is it?

The value of the fund can go down as well as up.

One way to estimate risk is to look at how much a fund's returns change over time. This is called "volatility".

Usually, funds with higher volatility will have returns that change more over time. They normally have a greater chance of losing money and also have a greater chance of higher returns.

Funds with lower volatility tend to have returns that change less over time. They usually have lower returns and may have a lower chance of losing money

No guarantees

Like most mutual funds, this fund is not guaranteed or insured. You may not get back the amount of money you invest.

Risk rating

Money market funds are generally expected to be a low risk investment category when compared to equity funds. This is due to the high credit worthiness, liquidity and shorter maturity of the investments. However, the return earned on units of the Fund will change in line with changes in current interest rates attributable to the underlying investments.

For more information about the specific risks that can affect the fund's returns, see the sections entitled "What are the risks of investing in the fund?" and "Who should invest in the fund?" in the fund's explanatory memorandum.

How has the fund performed ?

This section tells you how the fund has performed over the past 07 years. The returns are after all fees and expenses have been deducted.

The 07 day annualized yield is 11.55% (24 Oct - 31 Oct 2018), It tells investors what the fund would yield in a year, based on the returns earned in a 07 day period.

Year-by-year returns

This chart shows how the fund has performed over the past 06 completed calendar years and the Year to Date return 2018*. The fund's price dropped in value in none of the 07 years.

The range of returns and change from year to year can help you assess how risky the fund has been in the past. It does not tell you how the fund will perform in the future.

The Year to Date (YTD) return for 2018 has been calculated as at October 31, 2018 (annualized)

The Year to Date (YTD) return for 2011 has been calculated for the period from August 04,2011 to December 30,2011

Best and worst 3 - month returns

This table shows the best and worst returns of the fund in a 03- month period (non annualized return) over the past 07 years and the 03 - month return for the period ending October 31,2018.

The best and worst 03 month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	Average Weighted Fixed Deposit Rate	NDB-CRISIL 91d T Bill index	Money Market Fund	3 months ending	If you invested LKR 1million at the beginning of the 03 month period
