How risky is it?

The value of the fund can go down as well as up.

One way to estimate the risk is to look at how much a fund's returns change over time. This is called "volatility".

Usually, funds with higher volatility will have returns that change more over time. They normally have a greater chance of losing money and have a greater chance of higher returns.

Funds with lower volatility tend to have returns that change less over time. They usually have lower returns and may have a lower chance of losing money

Risk rating

Equity funds are generally expected to be of high risk and a growth category of investment. This is due to the fact that the fund invests for capital growth/appreciation, by trying to grow the investors money over time.
